A twinkling of lights reflects on the water, a magical backdrop of luxury hotels, crowded cafés, cultural salons, exclusive dinners, glittering parties. Like a dance, motorboats and water taxis cruise the canals accompanying artists and *socialites* who come to the Venetian lagoon for social events, exhibitions and festivals. The buzz and entertainment of this unique place reverberate in the rooms that glow with elegance and glamour: certain *dolce vita*, eclectic and non-conformist atmospheres relive, transforming the dynamic contamination of eras and styles into a sophisticated contemporary attitude.

Rubino 75x150/30"x60" R Lucido

Canal Grande

How Canal Grande  
came to be:  
the story behind it

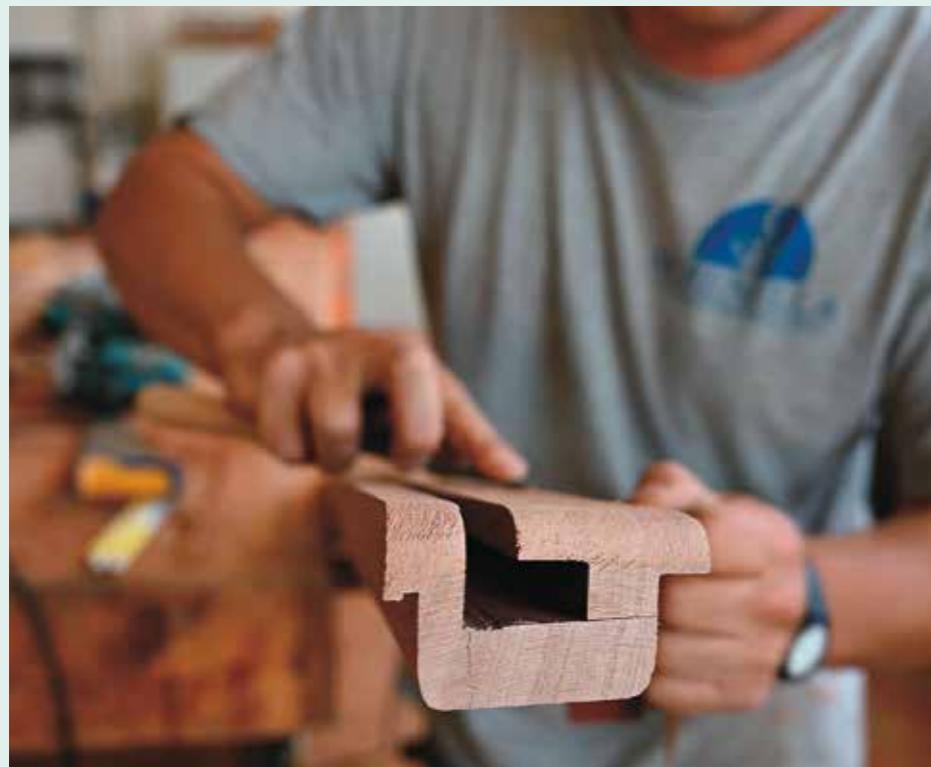

Canal Grande

Fascinated by wooden boats, an integral part of city life and its glamorous imagery, we explored techniques for reworking this ancient Venetian art into surface form. We immersed ourselves in a universe of wonderful sights and historical traditions as we discovered the nautical sector with its excellent craftsmanship in this very special place.

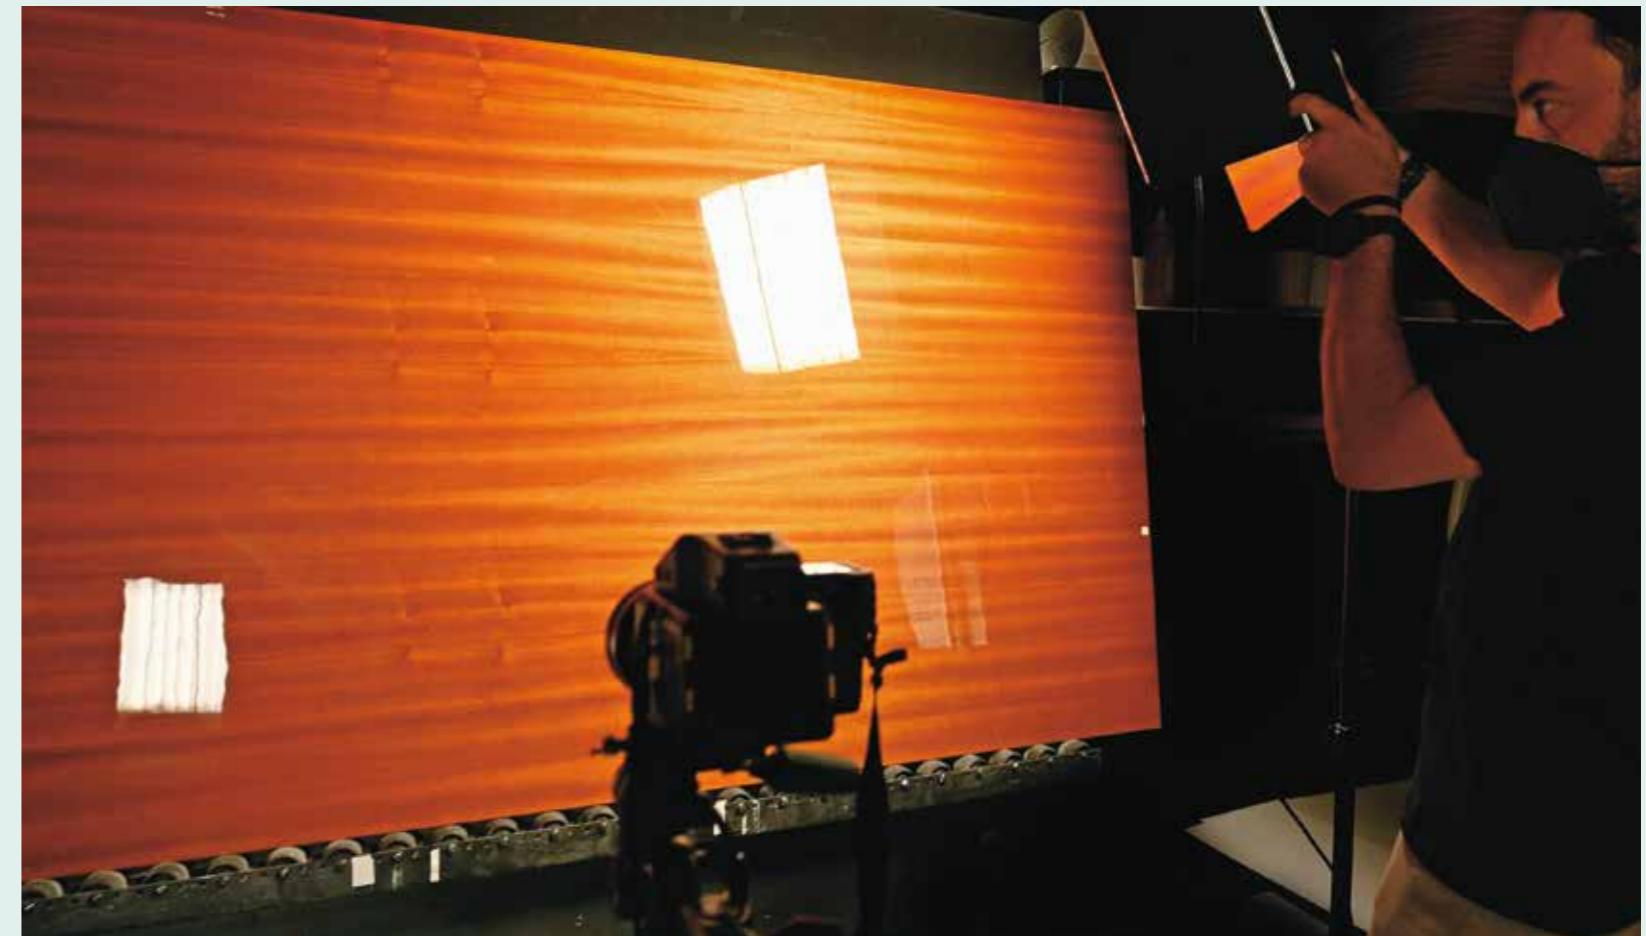

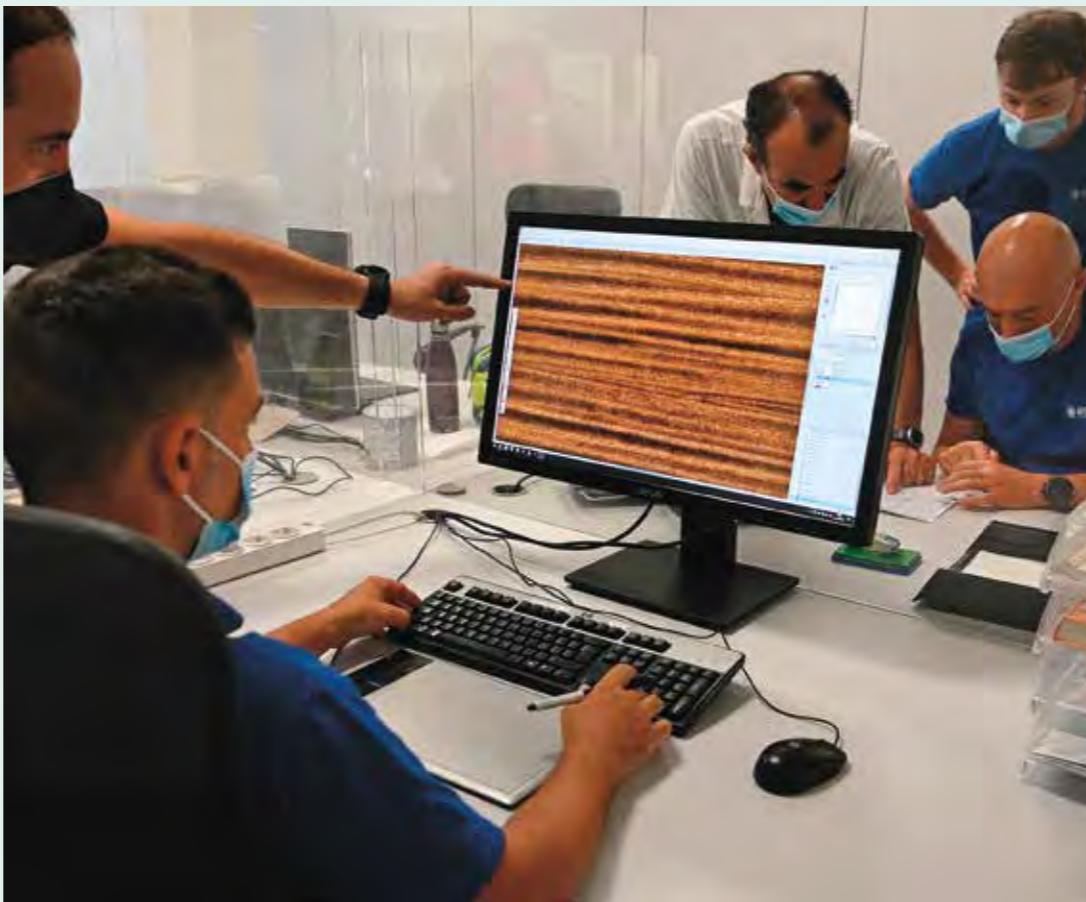

We visited the Cantiere Nautico Serenella, a historic shipyard in Venice (specifically on the island of Murano), to observe the steps that lead to the creation of the exclusive boats used by luxury hotels, cabs and private individuals to move through canals: a totally manual construction that involves 6 to 7 months.

Once the framework is completed, the planking is done by overlapping the outer planking with custom-made solid mahogany planks, in one piece from bow to stern. Next come the painting stages: between 12 and 14 coats are applied to flawlessly achieve the typical gloss, which also provides waterproofing. Mahogany is the ideal wood because of its properties (particularity of veining, elasticity), which lend themselves to the stresses and movements to which the boat is subjected, and its response to brackish water.

In our laboratory, we retraced the craftsmanship with the goal of synthesizing the processes and capturing those aesthetic qualities for which mahogany is traditionally used. After careful analysis and selection of the type of mahogany to start with, we worked to identify the most effective photographic techniques to capture light and thus create a 3-D effect on the tile, which acquires a special depth. Wood treated by the skilled hands of artisans and enhanced by our research thus becomes an original work, which we have transported into spaces to tell this story of beauty and uniqueness.

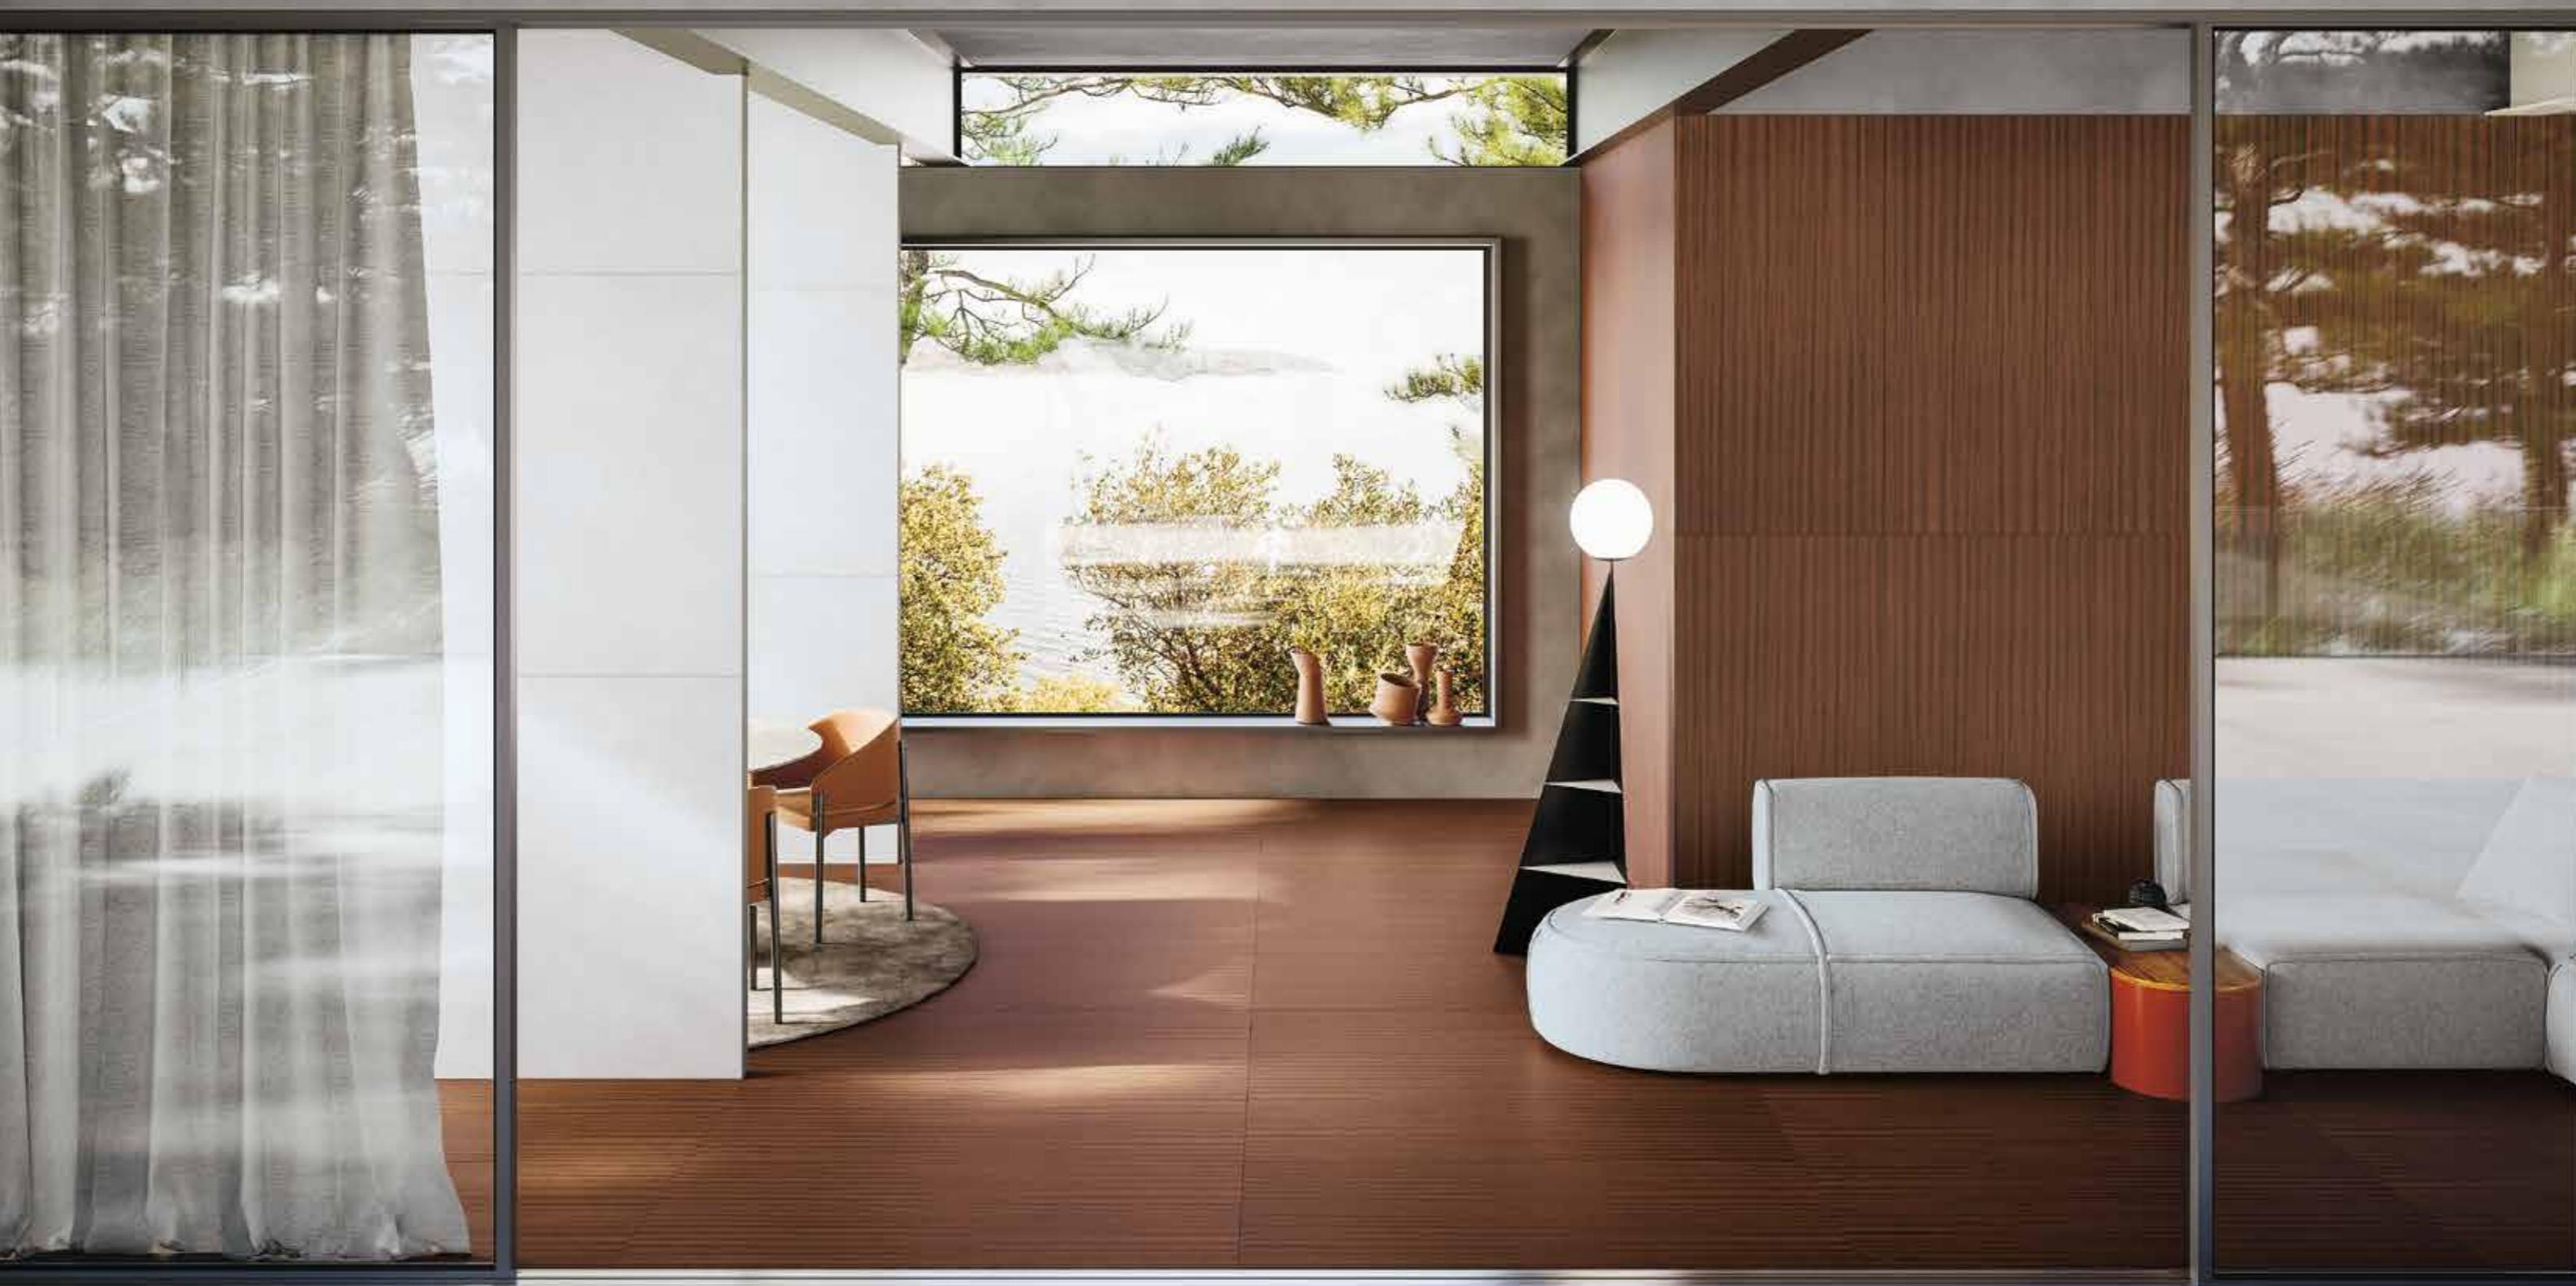

Venice, with its history, its charm and all its elements, including natural ones, such as water and its reflections, becomes the protagonist of an unprecedented collection with a gently vintage accent, interpreted with contemporary taste, to express the potential of our research.

We looked at vintage motorboats and Venetian taxis, traditionally made of mahogany, and translated the main qualities of this wood, developing a directional and intense aesthetic to convey a sense of depth and three-dimensionality.

Rubino 75x150/30"x60" R Soft

Canal Grande

The special effect, which almost seems to animate the surface, is achieved by irregular lines that run parallel, creating visual and light effects, emphasized by the glossy finish, Lucido. The palette comes from the nautical world: Rubino is the most unusual and distinctive shade, characterized by a dominant red that defines refined surfaces; Noce is a light brown, luminous and versatile; Moro is a dark shade, intriguing and enveloping. Canal Grande is available in the 75×150 size in all colors with a glossy finish, Lucido and also Soft; there is also a 25×150 size in all colors with a Soft finish. Decorations complete the collection: the geometric *Club* embellished with the metal insert and the *Onda* mosaic with its elegant vintage style.

Moro 75x150/30"x60" R Lucido

Canal Grande

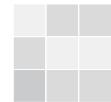

Canal Grande is offered in two finishes: Lucido makes the ceramic reflective, an immediate reference to the wood of the boats that inspired the collection; Soft features a matt effect that softens contrasts and returns a more modern visual result.

*Club* is a rectangular module measuring 75×150 cm available in all colours in the Lucido finish: the brass-coloured rod inserted in the stoneware - flush with the surface - allows you to create different installation patterns horizontally and vertically. *Onda* is a mosaic composed of two symmetrical half-arch halves; the half-arch is in turn formed by three parts that can all be of the same colour (Moro, Noce or Rubino) or a mix of two different colours (Moro and Noce), always in Soft finish.

Placing the two halves at the same height creates a complete arch pattern, for a wall with a classic taste where the arches follow one another in a regular way, all in the same direction or in alternating rows; if they are laid offset, the arch is interrupted and the surface acquires greater dynamism, which is further accentuated if the double-tone version is chosen.

**Colour shading**

The slight chromatic variation and the veining of the product is an intrinsic feature to re-create the randomness and richness of the colour shading of natural stones to which the collection is inspired. For these reasons, we recommend installing the product choosing tiles from different boxes in order to guarantee a variable and natural random effect of the finished surface. Due to these intrinsic features of the product, the colours represented in this catalogue must only be considered an example of the many possible colour shades.

**Certified quality**

Ceramica Refin SpA is ISO 9001 certified. The entire production process is subject to strict controls for guaranteed high-quality materials.

Ceramica Refin reserves the right to change the products presented in this catalogue at any time.

All the intellectual property rights of this catalogue are reserved in all countries. Translation, reproduction in print or electronic form, and adaptation, in whole or in part, using any means (including microfilm and photocopy formats) of the contents of the said catalogue constitute a violation of REFIN SpA's copyright. The products featured in the photographs in this catalogue are protected by current industrial property legislation.

The information contained in this catalogue is correct to the best of our knowledge, but is not to be construed as legally binding. We reserve the right to make changes as and when production requirement demand them necessary. Weight, colours and Size are subject to the usual variation expected in fired ceramic products. Colours shown are as close to the real colour as the limitation of the printing process will allow. While being the result of carefully effected studies and tests, these suggestions and instructions should be considered purely indicative. The technical characteristics given in this catalogue cancel and replace all previous characteristics in the general catalogue and in the range catalogues.

\* Per piastrelle rettangolari, che abbiano il lato maggiore L ≥ 60 cm, e rapporto tra i lati ≥ 3, la misurazione della ortogonalità deve venire condotta solo sul lato corto.  
For oblong tiles with L ≥ 60 cm and ratio length/width L/W ≥ 3, measurement of rectangularity only on short edges.

WARNING: THE POLISHED (LUCIDO) SURFACE DOES NOT MEET THE MINIMUM COEFFICIENT OF FRICTION, ACCORDING TO THE MOST RELEVANT NATIONAL STANDARDS FOR ANTI-SLIP RESISTANCE (AS PER EXAMPLE ANSI 1371-2012/BOT3000; B.C.R.A. REP. CEC/81; DIN 51130; DIN 51097). THEREFORE WE RECOMMEND TO USE POLISHED (LUCIDO) FINISH FOR WALL APPLICATION ONLY.
